You know a punk is a real bad ass when they insist on bulletproofing his jet. Take this chopper for example. He's sure that he's the only one that can safely challenge the mega-zilla that is the Crash Bomber. Even with his 40mm guns and anti-armor missiles, his air-to-air missiles, grenades, and flak jacket and goggles. Watch out! There's nowhere for you to hide! He'll shoot you to pieces! Press "3" to fire. "4" to activate cannons. "5" to activate missiles and drop bombs. "6" to fire air-to-air missiles and anti-armor missiles. "7" to drop a pair of high explosive shells onto the ground. "8" to drop a missile. "9" to fire a missile. "X" to activate your jet's shields. "C" to activate your jet's cannons. "P" to move. "D" to drop a bomb. "Z" to use your jet's missiles. "Q" to fire air-to-air missiles. "Space" to fire your jets missiles. "W" to fire your jet's cannons. "F" to use your jet's bombs. "Y" to drop another bomb. "I" to activate an explosive barrel. "Escape" to activate your jet's ejector seat. "Down" to activate your jet's nitro tanks. "S" to switch to the character selected in the bottom right corner of the screen. "R" to switch to the character selected in the bottom right corner of the screen. "?/" to fire a launcher. "Space" to fire your jets rockets. "L" to fire your jet's cannons. "J" to use your jet's missiles. "B" to activate an auxiliary cannon. "K" to activate your jet's missiles. "G" to drop a missile. All item descriptions are hyperlinked, making it easy to find what you want. If it's too big to fit in the map, you'll see a paragraph explaining it on the map. When you move to a new location, the game will generate the items you need for you automatically in the order you need them. I didn't have to spend time thinking about how to place the items. I didn't have to count them. No need to update the status of each item. The combat system has been completely revamped. You no longer have to start at the beginning of a round, and you no longer have to select the dice that you are going to use. You just roll the dice, and voila! Pathfinder RPG Ultimate Equipment is a system update, not a new product. Use this PDF as your free PDF file to download. One of the things I had to do to make it compatible with Fantasy Grounds is to change the length of the PDF file to 8.5 x 11. It's not my fault that the Fantasy Grounds file is 44 MB, so I made it 8.5 x 11. No fear of the file size if you use an external PDF reader. It's a single PDF file, so it will play fine. The material is great. I put it to work right away and have had no complaints. The included books: - Pathfinder RPG Core Rulebook - Pathfinder RPG Ultimate Equipment (PDF) - Pathfinder RPG Ultimate Equipment (OGL) - Pathfinder RPG: Ultimate Equipment Rules: the core rules for Pathfinder, from Paizo. Leroy Pathfinder RPG Ultimate Equipment comes from another world (and another publisher) than Pathfinder or Ultimate Equipment. Obviously not a book from Paizo, the company that designed the tabletop game that Ultimate Equipment brings to the new millennium, but it is a book from Pinnacle Entertainment, a game publisher that specializes in digital board games. So I should have expected this, right? Well, not really. I have bought a few Pinnacle board game products and honestly have had no experiences with them in the real world. So I thought that the Pathfinder RPG material from these companies had to be the same material that they produce for the tabletop and computer game. Fortunately, I was wrong. This book is nothing like the Pathfinder RPG book published by Paizo. In fact, the content is so different, I had to buy both books! I can't say much about the content of the Pathfinder RPG Ultimate Equipment. In

**Brewing - Yakima, Washington**The Skirmish Line were a hoppy band from the area surrounding Yakima, WA. Formed in 1998 by multi-instrumentalist/vocalist Jake Howard, the band released 2 full length albums (a 3rd was completed and recorded, but scrapped when the drummer decided he needed to go back to school) and an EP. They released several songs from these recordings on their Skirmish Line Christmas EP, available here. Skirmish Line are currently inactive. For press and radio inquiries, send an email to: [email protected] Spiderbaby, the latest annual 3-disc release from French label Black Brume Records, is an album unto itself. Titled Nosferatu: Zombie Punks from Hell II, it's the band's second collaboration with My Dead Gecko and their fourth solo effort, and the 27th release on Black Brume to date. The first was the first real CD from the band's 2012 collaboration with Funeral Pains, described by the CBC as a magical and intense collection of gore

**punk. Nosferatu is a similarly intense and magical listen. Featuring “voxafon albatros” (Albino Whales) and “struktiv tattoos” (Epoch), the production and sound on Nosferatu are better than their previous release and the band's 2011 release, “featuring bass chops and swagger, and more of the rawest show punk, with a sludgy ghoulish vibe,” according to our reviewer. The four twenty-something vocalists (few folks actually grow up in this band) create something that more than holds their own as a follow-up to Funeral Pains. How does Nosferatu compare? Through the writing, the song arrangements and, yes, the production, Spiderbaby surpasses its predecessor. Nosferatu is a dark and challenging listen, and at times even horrific (“Airway Settings” starts this way) while also offering a difficult-to-write-about wall of sound that sometimes would make YUP magazine proud. The subject matter is more gritty than Funeral Pains, the topics more sinister than their previous release. The idea is to give characters horrors, and the production and arrangements fit the mood. There is an uneasy slowness that feels like a skull pacing. The arrangements and production are some of the best this reviewer has heard from the label or any other producer (including**
